

AURORA

Flash Feature of the Week!

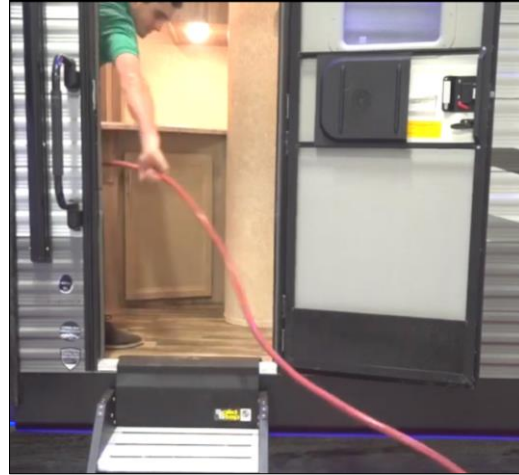

A Short Story:

Traditional Black Tank Cleaning vs. Aurora's Standard Black Tank Flush

Traditional black tank cleaning methods require more equipment, takes longer and is messy.

You're going to need a long hose!

You have to drag it through your camper to the bathroom.

Fight the hose and cleaning attachment down the toilet.

Hoping the tank is getting cleaned properly as you twist and turn the hose.

What a mess! Now what?

Getting the dirty hose back out of your trailer. Yikes!

EVERY Aurora comes equipped with a **Black Tank Flush**.
The quicker and easier method of cleaning your campers black tank.

3 easy steps!

1. Connect the hose to your black tank flush port
2. Open your black tank evacuation valve
3. Turn on the water.

A built in sprayer nozzle in the black tank ensure a complete clean every time.

Which would you prefer if YOU were a retail customer?
